Letter Circular LC 9

October 12, 1921

METALLURGY

(The publications not starred may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C., at the prices stated. Those marked with a star are out of print, but may be consulted at leading libraries.)

Scientific Papers

Number	Title	Price
*S 24	Radiation from platinum at high temperatures (1905) . .	5¢
S 38	Experiments on the Heusler magnetic alloys (1906) . .	10¢
*S 55	Radiation from and melting points of palladium and platinum (1907)	10¢
*S 62	Melting points of the iron-group elements of a new radiation method (1907)	10¢
S 78	The best method of demagnetizing iron in magnetic testing (1907)	15¢
S 99	Methods of obtaining cooling curves (1908)	10¢
S 109	The testing of transformer steel (1909)	5¢
*S 121	The estimation of the temperature of copper by means of optical pyrometers (1909)	5¢
S 124	Platinum resistance thermometry in high temperatures (1909)	10¢
S 161	The determination of vanadium in vanadium and chrome-vanadium steels (1911)	5¢
S 198	A micropyrometer (1912)	5¢
S 205	Melting points of the refractory elements. I. Elements of atomic weight from 48 to 59 (1913)	5¢

Publication Information Section
Bureau of Standards, Washington

Number	Title	Price
*S 213	Critical ranges A2 and A3 of pure iron (1913) . . .	20¢
S 224	The emissivity of metals and oxides. I. Nickel oxide (NiO) in the range 600 to 1200°C (1914) . . .	10¢
S 236	Electrical resistance and critical ranges of pure iron (1914)	5¢
S 242	The emissivity of metals and oxides. II. Measurements with the micropyrometer (1914)	5¢
*S 243	The emissivity of metals and oxides. III. The total emissivity of platinum and the relation between total emissivity and resistivity (1915) . . .	5¢
S 249	The emissivity of metals and oxides. IV. Iron oxide (1915)	5¢
S 250	Characteristics of radiation pyrometers (1915) . .	20¢
S 254	A study of the quality of platinum ware (1915) . .	10¢
S 266	Preparation of pure iron and iron-carbon alloys (1916)	10¢
S 272	Correlation of the magnetic and mechanical properties of steel (1916)	15¢
S 280	Further experiments on the volatilization of platinum (1916)	5¢
S 296	Thermoelectric measurement of critical ranges of pure iron (1916)	5¢
S 321	Thermal expansion of alpha and beta brass between 0° and 600°C, in relation to the mechanical properties of heterogeneous brasses of Muntz metal type (1918)	10¢
S 335	Effect of rate of temperature change on the transformations in an alloy steel (1919)	5¢
S 337	Constitution and metallography of aluminum and its light alloys with copper and with magnesium (1919).	10¢
S 343	Location of flaws in rifle-barrel steel by magnetic analysis (1919)	5¢

Number	Title	Price
S 346	Oxygen content by the Ledebur method of acid Bessemer steels deoxidized in various ways (1919) .	5¢
S 347	The heat treatment of duralumin (1919)	10¢
S 348	Use of a modified Rosenhain furnace for thermal analysis (1919)	5¢
S 350	Equilibrium conditions in the system carbon, iron oxide, and hydrogen in relation to the Ledebur method for determining oxygen in steel (1919) . . .	5¢
S 356	Notes on the microsctructure of iron and mild steel at high temperatures (1920)	10¢
S 363	Preparation and reflective properties of some alloys of aluminum with magnesium and with zinc (1920)	5¢
S 376	Critical ranges of some commercial nickel steels (1920)	5¢
S 377	The intercrystalline brittleness of lead (1920) . .	5¢
S 379	Reflecting power of monel metal, stellite, and zinc (1920)	5¢
S 395	Relation of the high-temperature treatment of high-speed steel to secondary hardening and red hardness (1920)	5¢
S 396	Thermal and physical changes accompanying the heating of hardened carbon steels (1920)	5¢
S 397	A study of the relation between the Brinell hardness and the grain-size of annealed carbon steels (1920)	10¢
S 399	Metallographic etching reagents: I, for Copper (1920)	10¢
S 404	The magnetic reluctivity relationship as related to certain structures of a eutectoid carbon steel (1920)	5¢
S 408	Effect of rate of cooling on the magnetic and other properties of an annealed eutectoid carbon steel (1921)	5¢
S 410	Thermal expansion of copper and some of its important industrial alloys (1921)	25¢

Technologic Papers

Number	Title	Price
T 6	The Determination of chromium and its separation from vanadium, in steels (1911)	5¢
T 8	A rapid method for the determination of vanadium in steels, ores, etc., based on its quantitative inclusion by the phosmolybdate precipitate (1911). .	5¢
T 11	Comparison of five methods used to measure hardness (1912)	5¢
T 24	The determination of phosphorus in steels containing vanadium (1913)	5¢
T 33	Determination of carbon in steel and iron by the barium chromate titration method (1913)	5¢
T 38	Observations on finishing temperatures and properties of rails (1914)	35¢
*T 59	Standard test specimens of zinc bronze (Cu 88, Sn 10, Zn 2)—parts I and II (1916)	25¢
T 60	The microstructure of changes accompanying the annealing of cast bronze (Cu 88, Sn 10, Zn 2) (1916)	10¢
T 61	Some foreign specifications for railway materials: Rails, wheels, axles, tires (1916)	25¢
T 69	Determination of carbon in steels and irons by direct combustion in oxygen at high temperatures (1916)	5¢
*T 82	Failure of brass. 1. Microstructure and initial stresses in wrought brasses of the type 60 per cent copper and 40 per cent zinc (1917)	25¢
T 83	Failure of brass. 2. Effect of corrosion on the ductility and strength of brass (1916)	5¢
T 84	Failure of brass. 3. Initial stresses produced by the "burning in" of manganese bronze (1916)	5¢
T 90	Structure of the coating of tinned sheet copper in a specific case of corrosion (1917)	5¢

Number	Title	Price
T 91	Temperature measurements in Bessemer and open-hearth practice (1917)	5¢
T 97	Some unusual features in the microstructure of wrought iron (1917)	5¢
T 103	Typical cases of the deterioration of Muntz metal (60:40 brass) by selective corrosion (1917)	10¢
T 118	A critical study of the Ledebur method for determining oxygen in iron and steel (1919)	5¢
T 126	A study of the Goutal method for determining carbon monoxide and carbon dioxide in steels (1919) . . .	5¢
T 129	Notes on the graphitization of white cast iron upon annealing (1919)	5¢
T 132	Mechanical properties and resistance to corrosion of rolled light alloys of aluminum and magnesium with copper, nickel, and with manganese (1919) . .	5¢
T 135	Behavior of wrought manganese bronze exposed to corrosion while under tensile stress (1919)	5¢
T 139	Some tests of light aluminum casting alloys—the effect of heat treatment (1919)	10¢
T 156	Metallographic features revealed by the deep etching of steel (1920)	10¢
T 158	A peculiar type of intercrystalline brittleness of copper (1920)	5¢
T 163	Stresses caused by cold rolling (1920)	5¢
T 172	Cast iron for locomotive cylinder parts (1920) . .	10¢
T 178	Steel rails from sink-head and ordinary rail ingots (1920)	20¢
T 179	The electric-arc welding of steel: The properties of the arc-fused metal (1920)	15¢
T 185	Experiments on copper crusher cylinders (1921) . .	10¢
T 188	Some properties of white metal bearing alloys at elevated temperatures (1921)	5¢

Circulars

Number	Title	Price
C 14	Analyzed irons and steels—methods of analysis . .	10¢
C 18	Standard gage for sheet and plate iron and steel .	5¢
C 25	Standard samples—general information	5¢
C 26	Analyzed iron and manganese ores—methods of analysis	5¢
C 31	Copper wire tables	20¢
C 35	Melting points of chemical elements, and other standard temperatures	5¢
C 42	Metallographic testing	5¢
*C 58	Invar and related nickel steels	10¢
C 66	Standard samples of thermometric fixed points . . .	5¢
C 67	Combined table of sizes in the principal wire gages	5¢
C 73	Copper	20¢
C 76	Aluminum and its light alloys	5¢
C 78	Solders for aluminum	5¢
C 80	Protective metallic coatings for the rustproofing of iron and steel	10¢
C 100	Nickel	20¢
C 101	Compiled tables of physical properties of materials	10¢
